

CLEVERCUT

Cutting Boards

Professional Quality HACCP APPROVED

Our professional quality CleverCut™ cutting boards are made from virgin high molecular weight polyethylene, and are suitable for both industry and home uses. These boards are widely used in the processing and preparation of foods in hotels, restaurants, butchers, dairy and seafood processing factories.

CleverCut™ cutting boards are

- physiologically harmless (non toxic)
- non aggressive to knife edges
- non porous and do not absorb moisture
- easy to clean
- stain, acid and odour resistant
- dishwasher safe

CleverCut™ cutting boards are available in six standard colours. By colour coding the food to the colour of the cutting board, the risk of cross contamination is greatly reduced. For example, red for raw meat, blue for seafood and green for vegetables etc.

The Granite look and other custom colours, designs and sizes are available on request.

CleverCut™ cutting boards are HACCP approved and comply to international hygiene requirements which permit its unlimited contact with foodstuffs.
